Deep Document Intelligence for IEEE Paper Compliance

John Doe, Senior Member, IEEE, and Jane Smith

Abstract·This paper introduces a real-time, offline document analysis pipeline for verifying format compliance, citation resolution, and multi-page structural integrity. We demonstrate automated evaluation of academic manuscripts across two-column layouts.

II. RELATED WORK

Text in column 2 line 1 referencing Table I and Eq. (1).
Text in column 2 line 2 referencing Table I and Eq. (1).
Text in column 2 line 3 referencing Table I and Eq. (1).
Text in column 2 line 4 referencing Table I and Eq. (1).
Text in column 2 line 5 referencing Table I and Eq. (1).
Text in column 2 line 6 referencing Table I and Eq. (1).
Text in column 2 line 7 referencing Table I and Eq. (1).
Text in column 2 line 8 referencing Table I and Eq. (1).

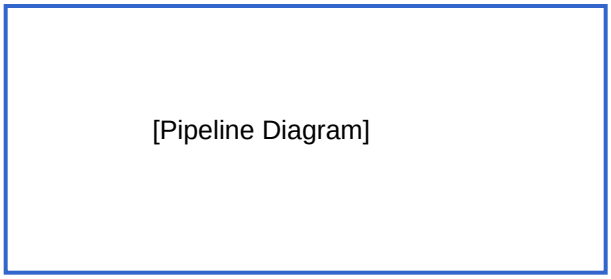

Fig. 1. Architecture of the multi-page compliance analyzer.

$$E = m c^2 + a b \tag{1}$$

III. RESULTS AND CONCLUSION

The proposed offline analysis successfully detected all formatting deviations.
